CHOOSE

BridgeHIV®

CHOOSE to prevent HIV and STIs—with confidence.

The CHOOSE research study is seeking young men ages 13-24 to help us see if digital health tools providing education about PrEP and DoxyPEP can help make it easier for you to choose the right PrEP and take it as recommended.

Get up to \$900 to receive PrEP and DoxyPEP counseling and medication at no cost to you, attend quarterly study visits, and complete surveys for 18 months.

Scan QR code or call
Bridge HIV at 415-355-4345
